GREY RHINO 

A new era has started: Grey Rhino Cargo Module

Digital logistics is driven by the need of new generation web-based logistics applications that enable collaboration and optimization, leveraging a central logistics information backbone that provides fully digital administration, allowing complete visibility, LIVE.

Keep IT Simple. When spreadsheets are no longer sufficient and micromanaging your business takes too much of your time. We implement the right FIT for your organization.

Are you also struggling to keep track of your shipments, documents and keeping your customers informed?

Our **Grey Rhino Cargo module** allows you to effectively keep track of cargo related shipments. Your process is leading in this cloud based tool. It's key strength lies in document control, live status notifications and track & trace portals. With power analytics, track your key business metrics, see longtime trends and identify outliers.

CARGO
